INDUSTRY EXPERIENCE

Web Engineer III

American Express

📅 August 2021 | Present

📍 New York, NY

- Incrementally redevelop the LoungeBuddy.com home page atop a more modern stack of technologies including Tailwind CSS, Next.js, and more.
- Leverage latest best practices for both front-end (React.js, Next.js, TypeScript) and backend facing technologies (Node.js, Express) through the development of an updated Promo Code Tool.
- Streamline the customer support process by creating a system to create, schedule, and manage promo codes as well as support tracking of their metrics.
- Develop a set of reusable components based on the LoungeBuddy design system for reuse across all LoungeBuddy web properties, accelerating time-to-market period for supported features in the future.

Product & Technology Intern

T-Mobile

📅 May 2021 - August 2021

📍 Overland Park, KS (Remote)

- Provided direction and guidance for process improvement and account for governance policies that represent the department to various customers and stakeholders.
- Consulted with cross-functional teams to detail insights that drive strategic initiatives and projects that outline corporate prioritization with actionable plans.
- Documented business operations requirements, utilizing best practices and communicating updates and tracking progress of efforts.

Front-End Engineer Intern

Nelnet

📅 June 2020 - May 2021

📍 Lincoln, NE (Remote)

- Researched and developed a variety of proof-of-concept applications demonstrating a variety of web development frameworks including Next.js, AWS Amplify, React Query and Recoil.js.
- Redeveloped the front-end for the Cardholder Portal application using the React.js framework.
- Leveraged the Material-UI component library for quick and easy web development iteration.

Front-End Engineer & Product Manager

Hoffman Strategy Group

📅 June 2020 - May 2021

📍 Lincoln, NE (Remote)

- Steered the product vision for the new Hoffman Analytics software subsidiary.
- Leveraged React.js and Material-UI to redevelop the front-end for a real-estate data analytics platform, improving the user experience and consolidating stakeholder processes.

EDUCATION

B.S. Software Engineering

Minor in Mathematics

University of Nebraska-Lincoln

📅 August 2017 - May 2021

Cumulative GPA: 3.64 / 4.00
